

## QT-B107 Temperature transmitter

**QT-B107** series temperature transmitter use special temperature module. Can modify all kinds of thermal thermocouple and thermo-resistance, output standard signal. Have characteristics of high precision, good stability, good capability of anti-interfering, waterproof, blast-proof, temperature resistance, and anti-vibration. The body's configuration is casting and stainless steel. The zero and range can be constantly adjusted.

**Dimensions:** (unit: mm)

**Specification:**

# QY Electronic Co., Ltd

## QT-B107 Temperature transmitter

---

Temperature range	-55℃~1200℃
Accuracy	$\leq \pm 0.5\%FS \pm 1.0\%FS$
Power supply	24 Vdc (12-30) VDC
Signal output	(Two-wire) 4~20mADC
	(Three-wire) 1~5VDC
Operating temperature	-20℃~80℃
Connection size	M27×2 or ceramic pipe or as user's choose
Medium	Gas and liquid compatible with 316LSS
